MEWP Standards

hercrentals.com
Call 888-777-2700 for rates and reservations.
Under the new standards, aerial work platforms (AWPs) will be called mobile elevating work platforms (MEWPs). MEWPs will also be classified differently.

**GROUP A**
MEWPs with platforms that move vertically but stay inside the tipping lines.

**GROUP B**
All other MEWPs, typically boom-type where the platform extends past the machine’s chasis.

**TYPE - TRAVELING**

**TYPE 1**
Can only be driven in the stowed position.

**TYPE 3**
Can be driven elevated but is controlled from the work platform.

This information is available online. Scan the QR Code to access more information, downloads, and videos on this solution.
What differences will the operator notice when operating an ANSI A92 compliant scissor or boom lift?

Current operators are required to be re-trained on the new standards.

**Scissor Lifts**

**A92 scissor lifts will be equipped with an audible and visual Overload Indicator.** The Indicator will be activated when the weight on the platform (occupants plus tools and materials) exceeds the rated machine capacity. If activated, machine functionality will be disabled only permitting the operator to lower the platform (if in the raised position). Weight will need to be reduced on the platform so as not to exceed the rated workload indicated on the capacity decal.

**Indoor / Outdoor selector switch.** Electric scissor lifts will be rated with different platform capacities depending on where the lift is being operated – indoors or outdoors. The operator will toggle the Indoor/Outdoor Capacity Select Switch to match the environment in which they are operating. For certain models, platform capacity and the permitted number of platform occupants will be reduced when the Switch is in the outdoor position.

**A92 increases the railing height on 19' and smaller scissor lifts to 43-1/2".** This increases the overall stowed height of the lift and will now require the rails to be folded down when the lift is driven through a standard single doorway (80" height).

**Boom Lifts**

**A92 requires a Platform Load Sensing System for monitoring the weight in the basket including occupants, tools and materials.** An audible and visual alarm will be activated and platform function controls will be disabled if the rated capacity is exceeded.

**The Platform Load Sensing System** automatically identifies the capacity zone on boom lifts equipped with conditional envelope limits (Dual Capacity ratings). The system will automatically prevent operation beyond the restricted zone if the platform weight exceeds the rated capacity.

**Dynamic Terrain Sensing System** will disable certain drive and boom functions if the base of the lift exceeds the slope rating of the machine.

---

**MEWP**

Mobile Elevating Work Platforms

Always consult the Operator’s Manual prior to operating any MEWP.
**SINGLE MAN LIFTS**

**JLG / EcoLift 70**
- Maneuver through narrow spaces
- Eco-friendly, no batteries/hydraulics/oil
- Innovative power-free design

**JLG / FT70**
- Assembled/disassembled in minutes
- Safe efficient ladder alternative
- On-board power source

**JLG / FT140**
- Assembled/disassembled in minutes
- Compact, 360-degree range of motion
- On-board power source

**GENIE / AWP-30S DC**
- Push-around style
- Small outrigger for positioning close to walls
- Super-straddle option to work over fixed seating

**GENIE / GR-12**
- Drivable at full height
- Ideal for maneuvering in tight spaces
- Can be driven through doorways

**GENIE / GR-20**
- Drivable at full height
- Compact and low-weight
- Can be driven through doorways

## ELECTRIC SCISSOR LIFTS

### SKYJACK / SJIII 3219
- Drivable at full height
- 3’ rollout extension deck
- Zero inside turning radius

### JLG / 2632ES
- Electric drive and integrated components
- Narrow profile fits through most standard doorways
- Tight turning radius

### GENIE / GS-3232
- Ideal for maneuvering in tight spaces
- Excellent for indoor/outdoor construction
- Low noise levels

### JLG / 3246ES
- Quiet, clean operation
- Electric drive and integrated components
- Tight turning radius

### GENIE / GS-4047
- Ideal for maneuvering in tight spaces
- Excellent for indoor/outdoor construction
- Low noise levels

---

**Safety Training Available**

We offer Equipment Safe Operation Training with top-notch instructors for many of the equipment categories we rent.

All courses include hands-on practical training and evaluation. Upon successful course completion, you’ll be issued a wallet card and certificate for the course.

**Classes:**
- U.S. - 1-888-658-5537
- Canada - 1-888-250-8480

## COMPACT ELECTRIC SCISSOR LIFTS

### MEC / MICRO 19
- On-board 100% fluid containment system eliminates the need for drip diapers
- Short overall length fits in most elevators 24”
- Rollout extension deck

### MEC / 1330 SE
- Fits in most elevators
- Compact design for tight work areas
- 2 person platform capacity

### ROUGH TERRAIN

#### GENIE / GS 2669 RT
- Up to 45% gradeability
- Rough terrain tires
- 4 person capacity

#### SKYJACK / SJ 8841 RT
- Driveable at full height
- 4’ roll out extension deck
- Outriggers for uneven ground leveling

#### JLG / 530 LRT
- Available with dual fuel or diesel power
- Standard 4’ deck extension
- Standard oscillating angle

### ARTICULATING BOOM LIFTS

#### GENIE / Z-30 20N RJ
- Works in tight spaces with zero tail swing
- Standard self-leveling platform
- Drive performance up to 35% gradeability

#### GENIE / Z-33/18
- Light weight for use on sensitive floors
- Narrow enough to drive through a standard double door
- Drivable at full height

#### GENIE / Z-34/22N
- XC models offer a 660 lb unrestricted and 1,000 lb restricted dual work envelope
- Rough terrain capabilities
- Land sense technology

#### GENIE / Z-33/18
- Improved multifunction capability
- Durable
- 550 lb capacity basket on 2018-new models

#### JLG / 600AJ
- Best reach envelope in its class
- Articulating jib for added maneuverability
- Fuel-efficient Tier 4 engine

#### JLG / 340AJ
- 4’ articulated jib
- Large work envelope
- Versatile performance

## HYBRID BOOMS

### GENIE / Z-60/37 FE
- Fuel Electric Hybrid articulating boom lift
- Ideal for outdoor and indoor applications
- Low noise and clean performance

### JLG / M600JP
- Zero emissions and reduced noise levels
- AWD for operation on most any terrain
- Plug in charging or onboard generator

### JLG / H340AJ
- AGM batteries charged by a diesel generator
- Work both inside and outside
- Reduced fuel usage

</tbody>
</table>

**Genie / S-65XC**
- XC models offer a dual work envelope
- Flood sensing technology
- Robust jib design for maximum basket capacity

### Telescopic Booms / 120’+

**JLG / 1350SJP**
- Large work envelope with 8’ jib
- 180-degree platform rotation
- 4WD and 4-wheel steer
