AIR COMPRESSOR

TOUGH/LIGHTWEIGHT

The XAS 110 is the result of over a decade of continuous development. The result is a compressor which can produce 110 CFM without the need for any exhaust after treatment.

However, we understand that this means nothing without efficiency, which can mean many things, such as: fuel consumption or increased utilization.

The 8 Series ticks all the boxes when it comes to delivering outstanding performance in all of these categories.
