

ProControlTM

NextGen

Remote Control

Increased Safety. Added Security.

With ProControl NextGen, your computer or smart device is your light switch.

Just imagine no more dim job sites jeopardizing the safety of your team; no more wasting valuable time manually turning light towers on or off at the beginning or end of the day; and no more open invitations for thieves to target your gear.

ProControl NextGen Remote Control

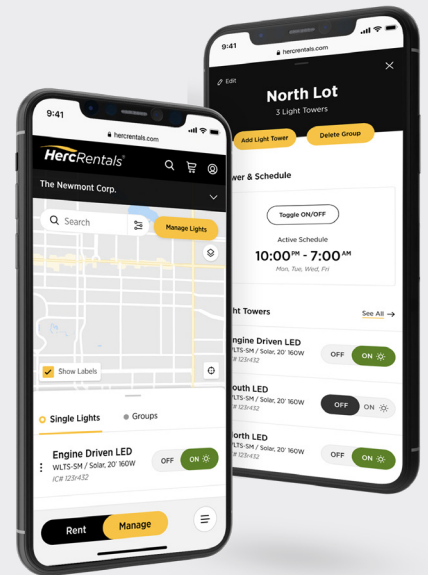

- Turn light towers on or off from anywhere
- Enhanced safety measures and alerts when turning towers on or off
- Reduce labor costs
- Create schedules and groups
- Set up and manage alerts
- Added security to protect job site
- Increase the safety of your team
- View power status and schedules by single lights or groups
- Activate or deactivate schedules on demand

Manage rented light towers anytime from anywhere — and across multiple job sites.

Get alerts, manage schedules, and see when equipment is running.

Remote Control

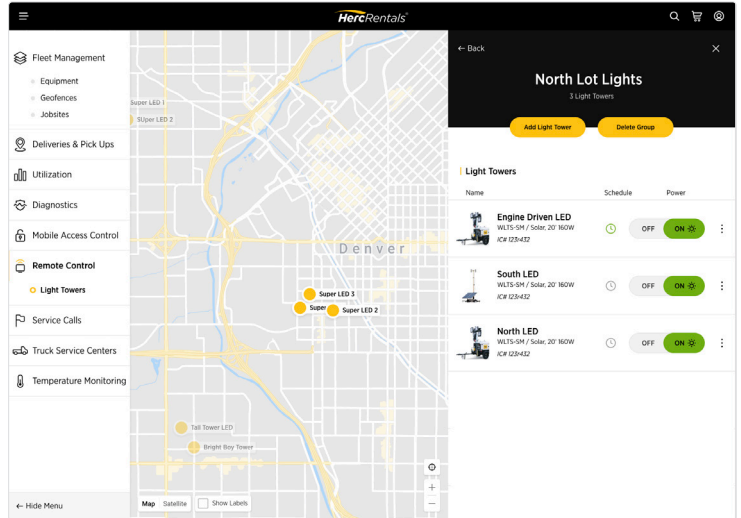

Increase job site safety while reducing labor costs with remote light tower control from Herc Rentals ProControl NextGen. With an easy-to-use interface on any smart device, you can now turn your light towers on or off from anywhere; giving your team the light they need to do their jobs safely and the ability to add a layer of security at the end of a day.
