

ProControlTM

NextGen

Utilization & Analytics

Boosted Efficiency. Optimized Productivity.

Fleet Utilization

- Reduce redundancy and optimize fleet productivity
- Analyze usage and trends to improve job site efficiency
- Set custom thresholds and configure related alerts
- Track equipment data such as utilization percentage, hours used, and miles traveled

Fleet Diagnostics

- Monitor equipment performance in real-time
- Receive applicable, real-time diagnostics including fuel level, coolant temperature and DEF levels
- Monitor ignition status, seat-belt usage, hard braking and battery voltage for applicable equipment
- Configure custom alerts and notifications

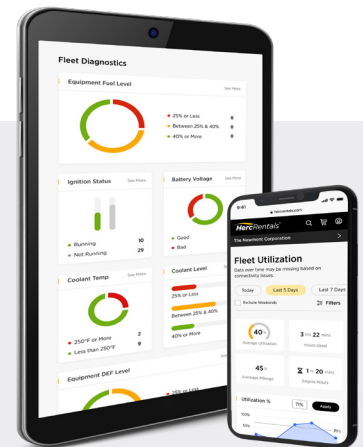

Reporting and Analytics

- Analyze data that is meaningful, useful and actionable
- Choose from a library of pre-built reports to customize or build your own
- Schedule and send frequently used reports to yourself and other account contacts

Herc Rentals' telematics technology provides real-time data to improve fleet efficiency and job site productivity.

Up-to-the-minute data is the driving force for successful fleet management, and now Herc Rentals is giving you the wheel. Our fleet management system features state-of-the-art fleet utilization technologies plus tracking and diagnostics — giving you the ability to manage your rental gear and equipment operators more efficiently and effectively. ProControl NextGen has been built from the ground up with input from dozens of fleet managers resulting in an intuitive user-friendly, and all-encompassing fleet management solution.

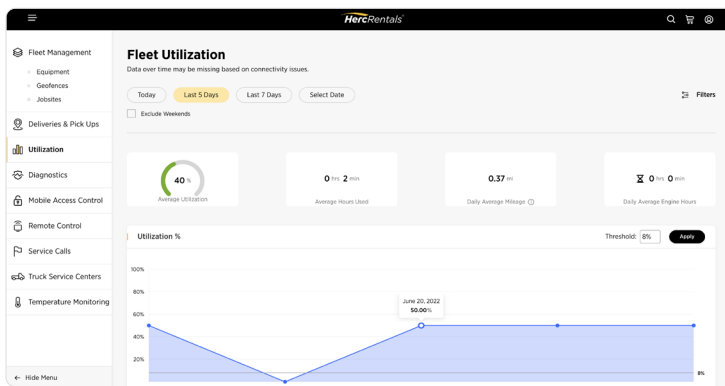

07 2022

Fleet Utilization

Reduce equipment downtime, become more proactive, and cost-conscious.

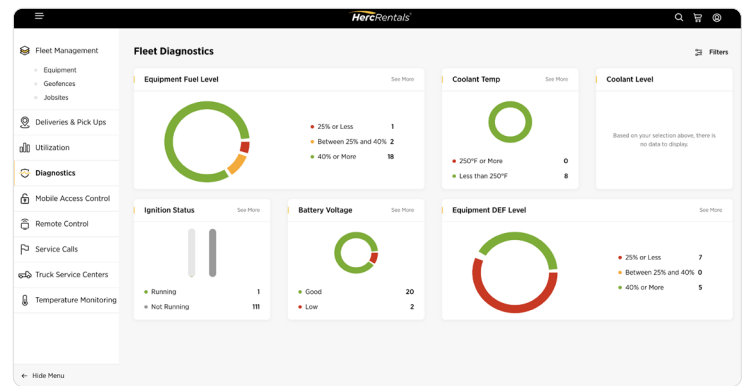

Offering vital information such as equipment utilization data and trends, ProControl NextGen gives you the knowledge needed to make informed, cost-conscious decisions to reduce redundancies and inefficiencies to optimize gear usage and performance. Fleet managers can set custom thresholds and configure related alerts, analyze equipment usage and trends, track utilization percentage, hours of equipment usage, miles traveled, and more.

Fleet Diagnostics

Improve inefficiencies and reduce equipment downtime.

If you're a fleet manager looking to get the most out of your rental gear, this platform is for you. ProControl NextGen allows you to monitor applicable fuel and DEF levels, coolant temperature, ignition status, seat-belt usage, hard braking, battery voltage, and more. Timely and actionable alerts are sent so you can take preventative or corrective measures from virtually anywhere and make informed decisions.

Reporting and Analytics

Customize a Pre-Defined Report or Build your Own.

18 pre-built reports and hundreds of configurable columns allow you to create truly customizable reports. Slice data from as high as an account-level down to an individual asset to make informed decisions for your business.

Performance Meets Security.

This powerful tool was engineered with a fine balance of security, performance, and intuitive design to enhance usability and experience. The ability to grant user's access to a single or multiple accounts provides powerful data without sacrificing security.
